Standardized Data Definitions

Full-time Equivalent (FTE) Student Semester calculation:

Student Semester FTE is a unit of measure derived from the Student Credit Hour (SCH). Generally, one undergraduate semester FTE is equivalent to 15 student credit hours and/or one graduate semester FTE is equivalent to 12 student credit hours.

Total Undergraduate Student Credit Hours / 15 = Undergraduate Full-time Equivalent Students (FTES) Total Graduate Student Credit Hours / 12 = Graduate Full-time Equivalent Students (FTES)

Annualized FTE

The undergraduate Annualized FTE is calculated as the sum of annual student credit hours for the academic year divided by 30.
The graduate Annualized FTE is calculated as the sum of annual student credit hours divided by 24.

Faculty FTE Measures

Faculty FTE calculations are performed for employees classified as APSCUF; where there is no distinction made between instructional and noninstructional classifications. Results are aligned in accordance with Article 23 of the *APSCUF Collective Bargaining Agreement,* calculated directly from the capacity utilization associated to base compensation for employees in an active pay status (i.e. this excludes employees in a leave without pay status). This does not include additional equivalencies associated to overload, summer, winter, distance education, individualized instruction, independent study, etc. Results will not exceed a 1.0 per individual.
Annualized Faculty FTE: Measurement of the employee utilization over the course of the academic year; a 1.0 full time equivalent of a faculty member is based across the span of 9 months, aligned to the academic terms of fall and spring.

Fall Faculty FTE: Measurement of faculty time *specifically* calculated for the fall term. These results are not a fall snapshot nor are they results across the entire fiscal year, rather these figures are the fall semester specific measurement of faculty time, which is referred to as the *periodized average FTE across the fall term*.
