

Parking Committee April 2022- William Parrish

Parking issues appear to be a non-issue right now seeing that nobody has been attending our parking committee meetings. There has been no student representation.

Every 5 years, we update our management plan. We don't conform to the borough rules so we apply for a zoning waiver. We just updated the plan. We gather a focus group consisting of commuter students, faculty, and students. Faculty had no issues. Students brought up safety concerns about parking at the library but our campus offers escorts at all times and can be initiated by calling the police.

We are discussing the possibility of letting freshmen park on campus and feel this can be used as a recruiting tool.
